DANIEL AGBONIFO

Full-Stack Developer
&
Data Analyst

About Me

As Full-Stack Web Developer, I have 3+ years of experience in both frontend and backend development. I specialize in designing and developing responsive, user-friendly, scalable, and high-performance web apps using a variety of latest technologies, frameworks, and libraries. I am well-versed in various client-side and server-side programming languages, and I can work effectively with databases, servers, and other critical components of web development.

As data analyst with foundational knowledge in machine learning, I am proficient in using MySQL, PostgreSQL, MongoDB, Python and its associated frameworks and libraries to source, analyze, create beautiful virtualizations of data sets, and communicate findings to stakeholders at all levels.

I also possess excellent communication, problem-solving and time management skills, along with strong aptitude for formulating strategies to improve productivity, and the ability to build and maintain effective working relationships with stakeholders at all levels.
